I think Ron and I will be in Farmington starting tomorrow. That should help also.

When we set up an Area Command it will all go through Durango. Please ask Farmington to inform Durango. That's how we'll start to get into a groove of formalizing incident command structure.

I believe Farmington but don't know about Durango.

I assume this is being handled through incident command? In Farmington, Durango or both?

We called Ms. Sandoval this evening. She's having one of her biologist and 2 game wardens fly up and assess the situation tomorrow. Without an RP, I would assume EPA would take the lead in contracting a wildlife rehabilitator. We then could/would get involved in helping wildlife capture and oversight of rehabilitation.

From NM

Our Department of Game and Fish needs help with wildlife (ducks, etc) covered in the yellow sludge. We don't have any resources for helping clean the animals.
